EXPERIENCE

Spherical.pm. September 2019 — till now.
Software development company, backend developer (internship).

Techboss. June - September 2019.
Software development company, backend developer.

EDUCATION

Rybinsk State Aviation Technical University named after P.A.
Solovyova, Rybinsk, 2016

PROJECTS

Developed beacon-based in-house navigation system for restaurant.

Take part in creation interactive endstation (like in McDonald's), for easy ordering and purchasing.

Worked with report automatization.

Made window application for quick work with JIRA (does some of the Jira features: log time, issue workflow, filters, authorisation, pomodoro timer, etc.)

Studied OTUS Web Python development course (2019).

As study developed Telegram bot (2018) for collecting, aggregation and analysis of arterial pressure with notifications and graphs.
(GitHub: <https://github.com/Kvm99/Telegram-Pressurebot> Bot link: https://t.me/ArtPressure_bot).

Start from LearnPython course (2018). Project: Secure Password Storage Firefox extension with Python
